**DETAILED ACTION**

***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 12/23/2009 has been entered.

***Response to Amendment***

2. Applicant's amendments, filed 12/23/2009, have been fully considered and reviewed by the examiner. Claims 1, 3-4, 812, and 21 remain pending in the instant application. In view of the amendment to the claims, the examiner has withdrawn the prior art rejections.

***Response to Arguments***

3. Applicant's arguments with respect to the Birakayala reference have been fully considered and are persuasive and the rejection over the claims has been withdrawn.

***Allowable Subject Matter***

4. Claims 1, 3-4, 8-12, and 21 are allowed.
5. The following is an examiner's statement of reasons for allowance:

- a. Claim 1 and dependents: These claims are allowed for substantially the same reasons as set forth in the Applicant's remarks dated 1/29/2010 and 12/23/2009. Specifically, while Birakayala discloses multiple gases that are byproducts there is no suggestion or reasonable expectation of predictability in the modification of a CVI process to control the process by measuring the effluent gas to measure allene and/or propene and expect to predictably control the process. In other words, there is no reasonable predictability in controlling the CVI densification process by measuring the effluent for allene and/or propene and based on this measurement adjust the flow rate of the hydrocarbon to maintain the measured concentration of allene and/or propene constants.
- b. Claim 21: None of the prior art cited or reviewed by the examiner, alone or in combination reasonably discloses the end of the densification process is detected by it becoming impossible to control the variation in the measured content by adjusting the selected parameter. Specifically, no prior art reasonably suggests a lack of control of the measure content of benzene, allene and/or propene indicates the end of the claimed densification process.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
